

Сведения о научном руководителе
диссертации Кудрявцевой Софии Станиславовны
«Взаимодействие амилоидогенных белков с шаперонами»

Научный руководитель: Муронец Владимир Израилевич

Ученая степень: доктор биологических наук

Ученое звание: профессор

Должность: заведующий отделом биохимии животной клетки Научно-исследовательского института физико-химической биологии имени А.Н. Белозерского

Место работы: Федеральное государственное бюджетное образовательное учреждение высшего образования «Московский государственный университет имени М.В. Ломоносова»

Адрес места работы: 119234, г. Москва, Ленинские горы, д. 1, стр. 40

Тел.: +7 (495) 939-14-56

E-mail: vimuronets@belozersky.msu.ru

Список основных научных публикаций по специальности 1.1.10 – «Биомеханика и биоинженерия» за последние 5 лет:

1. Stroylova, Y., Konstantinova, A., Stroylov, V., Katrukha, I., Rozov, F., and Muronetz, V. (2023). Does the SARS-CoV-2 spike receptor-binding domain hamper the amyloid transformation of alpha-synuclein after all? *BIOMEDICINES*, **11**(2):498.
2. Barinova, K. V., Serebryakova, M. V., Melnikova, A. K., Medvedeva, M. V., Muronetz, V. I., and Schmalhausen, E. V. (2023). Mechanism of inactivation of glyceraldehyde-3-phosphate dehydrogenase in the presence of methylglyoxal. *Archives of Biochemistry and Biophysics*, **733**:109485.
3. Yaroslavov, A. A., Efimova, A. A., Abramova, T. A., Pozdyshev, D. V., and Muronetz, V. I. (2023). Multi-compartment containers from a mixture of natural and synthetic lipids. *Mendeleev Communications*, **33**:221–224.

4. Kapitonova, A. A., Muronetz, V. I., and Pozdyshev, D. V. (2023). Sorted bulls' x-chromosome-bearing spermatozoa show increased gapdhs activity correlating with motility. *Genes*, **14**(1):235.
5. Atarod, D., Mamashli, F., Ghasemi, A., Moosavi-Movahedi, F., Pirhaghi, M., Nedaei, H., Muronetz, V., Haertlé, T., Tatzelt, J., Riazi, G., and Saboury, A. A. (2022). Bivalent metal ions induce formation of alpha-synuclein fibril polymorphs with different cytotoxicities. *Scientific reports*, **12**(1):11898.
6. Pozdyshev, D. V., Zharikova, A. A., Medvedeva, M. V., and Muronetz, V. I. (2022). Differential analysis of A-to-I mRNA edited sites in Parkinson's disease. *Genes*, **13**(1):14.
7. Leisi, E. V., Barinova, K. V., Kudryavtseva, S. S., Moiseenko, A. V., Muronetz, V. I., and Kurochkina, L. P. (2022). Effect of bacteriophage-encoded chaperonins on amyloid transformation of alpha-synuclein. *Biochemical and Biophysical Research Communications*, **622**:136–142.
8. Medvedeva, M., Kitsilovskaya, N., Stroylova, Y., Sevostyanova, I., Saboury, A. A., and Muronetz, V. (2022). Hydroxycinnamic acid derivatives from coffee extracts prevent amyloid transformation of alpha-synuclein. *BIOMEDICINES*, **10**(9).
9. Muronetz, V. I., Pozdyshev, D. V., and Semenyuk, P. I. (2022). Polyelectrolytes for enzyme immobilization and the regulation of their properties. *Polymers*, **14**(19):4204
10. Schmalhausen, E. V., Medvedeva, M. V., Serebryakova, M. V., Chagovets, V. V., and Muronetz, V. I. (2022). Products of s-nitrosylation of glyceraldehyde-3-phosphate dehydrogenase: Relation between s-nitrosylation and oxidation. *Biochimica et Biophysica Acta - General Subjects*, **1866**(1):130032.
11. Muronetz, V. I., Kudryavtseva, S. S., Leisi, E. V., Kurochkina, L. P., Barinova, K. V., and Schmalhausen, E. V. (2022). Regulation by different types of chaperones of amyloid transformation of proteins involved in the development of neurodegenerative diseases. *International Journal of Molecular Sciences*, **23**(5):2747–18.
12. Semenyuk, P., Evstafyeva, D., Izumrudov, V., and Muronetz, V. (2022). Synthetic sulfated polymers control amyloid aggregation of ovine prion protein and decrease its toxicity. *Polymers*, **14**(7):1478.
13. Rahban, M., Stanek, A., Hooshmand, A., Khamineh, Y., Ahi, S., Kazim, S. N., Ahmad, F., Muronetz, V., Abousenna, M. S., Zolghadri, S., and Saboury, A. A. (2021). Infection of human cells by SARS-CoV-2 and molecular overview of gastrointestinal, neurological, and hepatic problems in Covid-19 patients. *Journal of Clinical Medicine*, **10**(21):4802.

14. Tavakoli, N., Divsalar, A., Haertlé, T., Sawyer, L., Saboury, A. A., and Muronetz, V. (2021). Milk protein-based nanodelivery systems for the cancer treatment. *Journal of Nanostructure in Chemistry*, **11**(4):483–500.
15. Muronetz, V. I., Medvedeva, M. V., Sevostyanova, I. A., and Schmalhausen, E. V. (2021). Modification of glyceraldehyde-3-phosphate dehydrogenase with nitric oxide: role in signal transduction and development of apoptosis. *Biomolecules*, **11**(11):1656
16. Semenyuk, P. I., Kurochkina, L. P., Mäkinen, L., Muronetz, V. I., and Hietala, S. (2021). Thermocontrolled reversible enzyme complexation-inactivation-protection by poly(n-acryloyl glycinamide). *Polymers*, **13**(20):3601
17. Zanyatkin, I. A., Stroylova, Y. Y., Melnikova, A. K., Moosavi-Movahedi, A. A., Saboury, A. A., Haertle, T., and Muronetz, V. I. (2021). Unusual spiral structures formed by glycated β -casein in the presence of thioflavin t: amyloid transformation? *Mendeleev Communications*, **31**(1):73–75.
18. Sofronova A.A., Pozdyshev D.V., Barinova K.V., Muronetz V.I., Semenyuk P.I. (2021) Glycation of glyceraldehyde-3-phosphate dehydrogenase inhibits the binding with α -synuclein and RNA. *Arch Biochem Biophys*, **15**(698): 108744.
19. Medvedeva M., Barinova K., Melnikova A., Semenyuk P., Kolmogorov V., Gorelkin P., Erofeev A., Muronetz V. (2020) Naturally occurring cinnamic acid derivatives prevent amyloid transformation of alpha-synuclein. *Biochimie*, **170**: 128-139.
20. Barinova K.V., Serebryakova M.V., Eldarov M.A., Kulikova A.A., Mitkevich V.A., Muronetz V.I., Schmalhausen E.V. (2020) S-glutathionylation of human glyceraldehyde-3-phosphate dehydrogenase and possible role of Cys152-Cys156 disulfide bridge in the active site of the protein. *Biochim Biophys Acta Gen Subj*, **1864**(6):129560.
21. Semenyuk P.I., Moiseenko A.V., Sokolova O.S., Muronetz V.I., Kurochkina L.P. (2020) Structural and functional diversity of novel and known bacteriophage-encoded chaperonins. *Int J Biol Macromol*, **15**(157):544-552.
22. Kudryavtseva S.S., Stroylova Y.Y., Kurochkina L.P., Muronetz V.I. (2020) The chaperonin TRiC is blocked by native and glycated prion protein. *Arch Biochem Biophys*, **15**(683):108319.
23. Semenyuk P., Tiainen T., Hietala S., Tenhu H., Aseyev V., Muronetz V. (2019) Artificial chaperones based on thermoresponsive polymers recognize the unfolded state of the protein. *Int J Biol Macromol*, **121**:536-545.
24. Semenyuk P., Barinova K., Muronetz V. (2019) Glycation of α -synuclein amplifies the binding with glyceraldehyde-3-phosphate dehydrogenase. *Int J Biol Macromol*, **15**(127):278-285.

25. Barinova K., Serebryakova M., Sheval E., Schmalhausen E., Muronetz V. (2019) Modification by glyceraldehyde-3-phosphate prevents amyloid transformation of alpha-synuclein. *Biochim Biophys Acta Proteins Proteom.* **1867**(4):396-404.

Ученый секретарь
диссертационного совета МГУ.03.04

И.В. Шаповалова
